

partner of choice

Land Tejas Selects Honeywell.

When the founders of Land Tejas, the largest independent residential land developer in Houston, TX, crafted their vision to create a family of technology-ready communities, they turned to Honeywell as their Partner of Choice. At the start, Land Tejas recognized the importance of home technology and selected Honeywell's Internet Connection Module (ICM) to provide homeowners with environmentally friendly, energy efficient and secure homes.

With Honeywell's upgraded structured wiring and a home networking connection center, these Houston builders depend on Honeywell to provide quality and innovative technology throughout their Land Tejas communities.
