Connection

Honeywell

Convenience, Comfort and Control

Honeywell's VISTA ICM provides the highest level of peace of mind, comfort and control. Control your security system from any device with a Web browser? Receive e-mail alerts when your children have arrived home safely from school? Arrive after dark to a comfortable, well-lit home set exactly at the right temperature?* You bet. By simply using a touchscreen keypad, PC, laptop or PDA, your home will be more enjoyable—and your life easier—than you've ever dreamed!

Get Connected

From e-mail to cell phones, technology is a part of your family's everyday life. Thanks to Honeywell's VISTA ICM, now you can control your security system, network cameras, lights and more via touchscreens, PCs, laptops and PDAs—easily and affordably! Life has never been more manageable.

Temperature and Climate Control

VISTA ICM makes life more comfortable—and affordable!

- Come home from work to find the heating or AC set to the perfect level
- Automatically control thermostats remotely
- Save money by conserving energy through the control of thermostats and appliances
- Receive alerts (i.e. when the temperature is too hot or too cold in a basement or laundry room) to prevent potential problems like leaks, frozen pipes, etc.

Here's Looking at You

With cameras throughout your home, VISTA ICM lets you keep an eye on vulnerable areas such as a swimming pool, a baby nursery or the front door. You view the cameras remotely from any Internet connection, letting you check on your home while on vacation or at the office.

Always in Control

Since VISTA ICM communicates with virtually any Internet Explorer equipped device, you're always in control—wherever you are! Whether you're on your laptop, traveling with your PDA or even calling from your cell phone, you instantly have interaction with the command and control of your home. You can monitor activities and receive alerts when events happen.

You've Got Mail!

For added peace of mind, receive e-mail alerts on your computer, cell phone, BlackBerry® or PDA when your child returns home from school and disarms the security system.

Lighting

Never enter a dark home again! With the addition of an extra module, the VISTA ICM can intelligently manage lighting to suit your lifestyle and needs. The possibilities are endless!

- Create lighting scenes for different events from returning home from work to entertaining!
- Dim home theatre lights to set the right mood
- Turn on lights from your office computer or even on the way home so you arrive to a well-lit house
- Automatically turn lights on or off when the security system is armed or disarmed or after your family has gone to bed

*Lighting, heating and HVAC may require additional equipment.
