# Get Connected

As the Internet and high-speed data communications evolve, homeowners are discovering that the once costly and intimidating dream of the "smart house" is now an achievable and surprisingly affordable reality.

Honeywell's wireless solutions can help simplify and streamline the way you interact with your home on a day-to-day basis and help you and your family take advantage of everything the Internet and technology has to offer—making your lives more simple, enjoyable and productive. It's never been a better time to get connected.

## Go Wireless

Now, rather than having to 'plug-in' you can also simply connect with any device which has wireless networking capability. Honeywell creates an infrastructure that allows you to interconnect your computers, gaming consoles and other devices throughout the home, multiplying their effectiveness. And by networking printers, scanners and sharing files across a network, you can reduce the number of devices you need to purchase while giving everyone in the home access to the system and its resources. Play games, share printers, music files and surf the Internet simultaneously!

## Connectivity

Honeywell's wireless solutions allow simultaneous online access in multiple locations—with a single connection! One parent can download a recipe at one end of the house while a child researches a school paper. No more having to take turns or argue about time on the Internet!

## Flexibility

In addition to using any standard network enhancement devices, Honeywell offers specialized antennas which allow you to place the signal in those areas you want it most at a very affordable price.

## Productivity

With telecommuting and home businesses on the rise, the ability to integrate work needs into your home life is essential. Honeywell's wireless solutions lets any area inside—or outside—of your house become a hassle-free home office. Easily manage e-mail, multi-line phones, faxes, PDAs, file transfers and video conferencing from any room in the comfort of your home or even in the backyard by the pool!
