

a winning hand

Play Your Cards Right with Honeywell's GSM GPRS Solution

Why gamble with the future of alarm communications? With the sweeping changes facing the industry, Honeywell's end-to-end GSM GPRS digital wireless network solutions are the sure bet. You'll help boost your RMR and safeguard your accounts while delivering powerful communications solutions that address real challenges—including the ability to upload and download without the existence of traditional phone lines! And, in the near future, you can offer profitable, lifestyle-enhancing services including affordable system control via mobile phones, computers, PDAs and more—all from a long standing, trusted leader in alarm communications.

With GSM GPRS, both you and your customers win. Bet on it!
