Prevent Disaster Before it Happens

Damages from flood and temperature changes can cause personal and financial devastation for homeowners. Now you can offer your customers the industry's only wireless sensor capable of monitoring flood detection and cold temperature at the same time! Ideal for basements, bathrooms, laundry rooms, kitchens and more, Honeywell's 5821 Wireless Temperature Sensor and Flood Detector lets you choose one of five selectable temperature ranges and works with

VISTA and LYNX security systems. What's more, the unique, dual-purpose sensor has a battery life of up to 10 years, reduces installation time and provides your residential and commercial customers with the protection they need while providing a great opportunity for you.

Make sure flood doesn't dampen your customers' most treasured possession—their homes.
