

AlarmNet Direct

A Vital Link

Honeywell

Point. Click. Connect.

With AlarmNet Direct—Honeywell's exclusive, web-based programming tool—you'll have access to a powerful solution that provides a vital link to your AlarmNet devices while saving valuable time. Each radio is pre-activated with Cingular®, but needs to be registered with AlarmNet. Once you're logged in, you'll find that set-up of new and replacement devices couldn't be simpler!

➔ Getting to Know AlarmNet Direct

Select from a full menu of online programming features and account management options.

Show Programmed Devices

Displays all devices by account number, MAC ID and device type. "Actions" allows you to edit information, upload and download data, test, or delete the device.

Program New Device GSM/I

With just a few entries and the click of a button, new devices are programmed (ECP connection and standard supervision). "Advanced Programming" allows for non-standard installation.

Replace C Device

By entering key account information along with the MAC ID of the new device, programming replacement radios couldn't be easier.

Replace Other Device

Simple entry of device ID's along with the GSM/I MAC ID make this task a snap.

My Profile

Allows you to change or update your user information.

Manage Users

Provide access to additional members of your company. Add, delete or modify level of member access.

My History

Review all AlarmNet Direct activity by company members.

Feedback

E-mail AlarmNet with questions or comments.

Signing Up is Easy!

To gain access, you may request log-in credentials from your central station or sign up online.

- Visit AlarmNet Direct website:
<https://services.alarmnet.com/AlarmNetDirect>
- Complete the form to establish log-in credentials
- Only one sign-up per dealer company is necessary; additional log-ins may be created by the initial user
- For validation purposes, provide valid city/central MAC ID and MAC CRC from communication devices

Honeywell's AlarmNet is the leader in security communications technology. With an exclusive network developed to support new digital technologies and services, it's no wonder that the leading central stations turn to AlarmNet for their security communications.
