

Honeywell's Structured Solutions

INTEGRATED SECURITY SYSTEM

Peace of Mind

Honeywell

Sleep Soundly

To sleep soundly, you need peace of mind. You need to know that what you cherish most—your property and the people you love—are safe and sound. Now you can rest easy, because Honeywell's system integrates lighting, security—even televisions—to provide superior, round-the-clock protection for you and your family. You can get a good night's sleep, knowing that Honeywell will be up all night.

Honeywell's Structured Solutions are the industry's way to make any home—from apartments, condos and entry-level houses to custom residences—more enjoyable and convenient. You can choose packages that match your needs and budgets, and have access to the most advanced security, communications, entertainment and home control features at your fingertips. Since options vary according to individual builders, speak to your authorized professional about available packages.

Smart Security

Security has never been smarter, because Honeywell can actually take intelligent actions based upon the type of event occurring. Should an intruder attempt to break in, sensors not only alert you, but can turn on inside and outside lights to scare him away. This is often enough to send a burglar running. If a break-in does occur and your phone is taken off the hook and the line is cut, your system can seize the line and alert you and the authorities. In the event of an emergency, your Honeywell security system can even “call” you, your central monitoring station, the police or anyone else you specify.

Screen Visitors

When a visitor rings a doorbell, all home phones can ring automatically. Simply use the phone to talk to the visitor and dial a code to unlock the door. The outdoor camera can even send a picture to all the televisions in your home so you can see who's at your entranceway.

Cameras

Honeywell gives you the ability to view cameras around your home or on your computer anywhere over the Internet, with the assurance that your privacy is protected with the highest level of data security. Monitor a sleeping baby, screen visitors at your entranceway, keep an eye on vulnerable areas like swimming pools or view activity occurring around the exterior or interior of your home.

Lighting

Honeywell lets you easily create an on and off or rotating security schedule complete with lights and televisions to simulate a “lived-in” look when you're away.

Televisions

Televisions can be integrated to provide an added level of security, broadcasting pictures to any screen in your home. Checking on the baby is as easy as changing the channel. Should you hear a noise in the middle of the night, you can view any location inside or outside your home on any TV screen from the safety of your bedroom. You can even view these cameras over your office computer for added peace of mind.
