ULC Field Inspectors, Canadian Authorities Having Jurisdiction for Alarm Systems**

**SUBJECT: Fire and Burglary Alarm Equipment Certification Programs**

Underwriters Laboratories Inc. (UL) and its affiliate, Underwriters' Laboratories of Canada (ULC), are pleased to announce that, effective May 17, 1999, ULC will accept products bearing the C-UL Mark for use in fire and burglary alarm systems installed in Canada under ULC Certificate Service.

This acceptance of alarm equipment bearing the C-UL Mark allows manufacturers throughout North America to more efficiently achieve one-stop shopping for international product safety certification. By working with a single contact at one of UL's five North American offices (Camas, Melville, Northbrook, RTP, or Santa Clara), or ULC's office in Toronto, manufacturers achieve local access to U.S. and Canadian markets.

Underwriters Laboratories Inc. and Underwriters' Laboratories of Canada will continue to improve the system for global conformity assessment as we roll out new programs and services. If you have questions regarding this topic, please contact ULC Managing Engineer, Bruce Paterson at (416) 757-3611, or your local UL office.

Regards,

**Tony Crimi**  
Vice President, Technical Services and  
Chief Engineer  
Underwriters' Laboratories of Canada

**Lee Dosedlo**  
Global Chief Engineer
