

## WIN-PAK® SE/PE with Galaxy Integration

### Top 10 Dealer Benefits

#### **A complete integration platform for market leading access, intruder, and video products**

Using full software based integration, WIN-PAK seamlessly integrates the Honeywell's WIN-PAK access control solution, Galaxy intruder control panel (Dimension, G3 and XL ranges), Fusion and HRDP 'Performance Series' Digital Video Recorders. The ability to integrate these market leading solutions provides countless opportunities to offer end users major enhancements to existing, or significantly improve the operation of new security systems.

Create a single seat control and combine CCTV, intrusion and access into one modular security management platform, using floor plans, control maps and manual and automated interactions between all security disciplines.

#### **Scalable access control solution**

Supports up to 31,500 doors and an unrestricted number of cards in diverse hardware platforms in several topologies. Modular and growing with the end user's needs without needing to change the hardware.

#### **Complete visibility across video solutions**

Monitor and control multiple Fusion, HRDP 'Performance Series' and Rapid Eye™ Digital Video Recorders (DVR) supporting up to 32 cameras per DVR. Auto switching and manual monitoring for multiple CCTV-Matrix Switchers with support for 99 monitors and 999 cameras per switcher.

#### **Enhance the capability of existing intruder systems**

Upgrade multiple intrusion systems by monitoring and controlling up to 10 Galaxy panels in one graphical software package in a control tree and with floor plans. Galaxy user codes are attached to card holders for easy management of card holder privileges. Remote virtual keypad and upload, change and download user codes for remote Galaxy system maintenance.

#### **Cost effective solutions with entry level products Galaxy Dimension GD-48 and HRDP 'Performance Series' DVR**

Up to date Galaxy integration with the full range of the latest Galaxy Dimension Series panels. Cost effective access, video and intrusion integrated solutions can be achieved using WIN-PAK SE, Galaxy Dimension GD-48 and a HRDP 'Performance Series' DVR.

#### **Modular design and backwards compatibility**

WIN-PAK integrates with Honeywell products that have been popular with customers for years whilst its modular design means easy build-up of systems as funding becomes available – and no redundant equipment. In particular, each element of the security system (intruder, CCTV, access) can be properly tailored to meet individual requirements. The elements can also be installed in any order and easily integrated when required for example, if a Galaxy system is already installed, WIN-PAK can be used on Galaxy Dimension, G3 and Classic systems. If a Fusion or HRDP 'Performance Series' DVR is added this can be combined with the existing system to meet security needs.

## Top 10 Dealer Benefits (Continued)

### The flexibility to be creative

WIN-PAK is flexible enough to meet even the most demanding of security needs. Features such as the ability to use the software just for Galaxy and Fusion integration enable direct on screen live camera view of the alarm in the intrusion system with easy three step look up of historic events in the Galaxy system with recorded video data from Fusion.

### Total customisation through macros

Unlimited customisation of cause and effect across the whole security system can be created using easy to programme macros (command files). For example, if a Galaxy group is set, the local doors can be locked or the local reader modes changed to card and pin to prevent unauthorised entry into an alarmed area - minimising the risk of false alarms.

### Automated systems

WIN-PAK provides multiple ways to schedule reports. You can create and print reports automatically or e-mail and, with the addition of Galaxy, users can also run reports on any access or intrusion alarm or event.

### One Honeywell solution - one Partner of Choice

For both end users and installers there is a major benefit in the complete security system; software and hardware, coming from one manufacturer. No more issues of incompatibility or lack of problem ownership. One global security player standing behind the installer providing comprehensive support and service. One Honeywell brand giving end users total confidence in the technical capability and reliability of the products and in the absolute commitment to end user satisfaction.
