

Critical Infrastructure Security Solutions

INTEGRATED AND LAYERED
SECURITY OPTIONS

Your Choice in Security

Honeywell

Honeywell

A Legacy in Excellence

For more than two decades, Honeywell's security solutions have been chosen worldwide to protect people, property and assets. Honeywell's integrated Pro-Watch®, Vindicator® and MAXPRO® VMS solution combines visitor management, access control, video management and intrusion into one powerful system.

It's a simple choice.

Choose Honeywell for End-to-End Security Solutions.

Pro-Watch

- Access alarm and event data anytime, anywhere
- Advanced badging
- Compliance reporting

Vindicator IDS

- Reliable, fast, ruggedized
- Perimeter protection for large scale installations or harsh environments

MAXPRO VMS

- True video management system
- Powerful customization
- Multi-system view and control

Ports and Critical Infrastructure
Energy Generation Facilities
Industrial Sites
Corrections
Military, Federal and State Governments

Certifications

DCID 6/9 and ICS 705-2
for Sensitive Compartmented
Information Facilities (SCIF)

UL-1076/294/864

FIPS 46-3 (TDEA encrypted
communications) and **FIPS 197**
(AES encrypted communications)
certified by NIST

FIPS 201 Personal Identity
Verification

GSA Contract: **GS07F9785H**

Critical infrastructure facilities around the world trust Honeywell to meet their most demanding security needs. We protect their perimeters, control access throughout their facilities and perform the video assessment required for security personnel to react immediately—and accurately—to incidents. Whether vandalism, theft or terroristic in nature, security

incidents disrupt production and have the potential to put lives at risk. Our integrated, layered approach to security provides advanced notification of threats—keeping production going and saving lives.

Honeywell stays up to date on the complex state and federal government regulations that critical infrastructure facilities face. Our solutions are

designed to meet these regulations to ensure your facilities avoid harsh non-compliance penalties. We maintain the highest level of information assurance standards, keeping all security-related information secure.

Integrated Security Solution

One **Manufacturer**

Pro-Watch®
Upgradeable with Vindicator and Salto Integrations

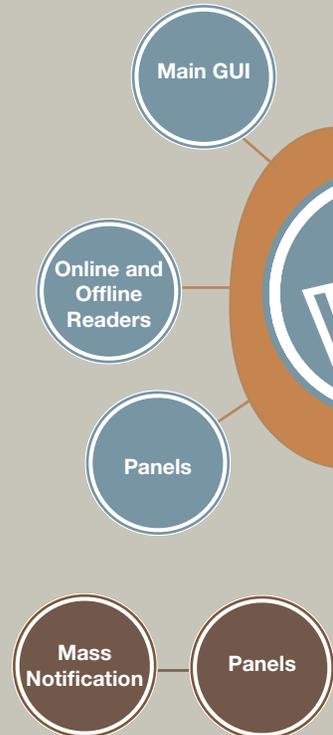

Event and alarm sharing across system

Vindicator®
Ruggedized, reliable devices that require minimal maintenance

Add a layer of perimeter security without adding additional monitoring UI or head-end equipment

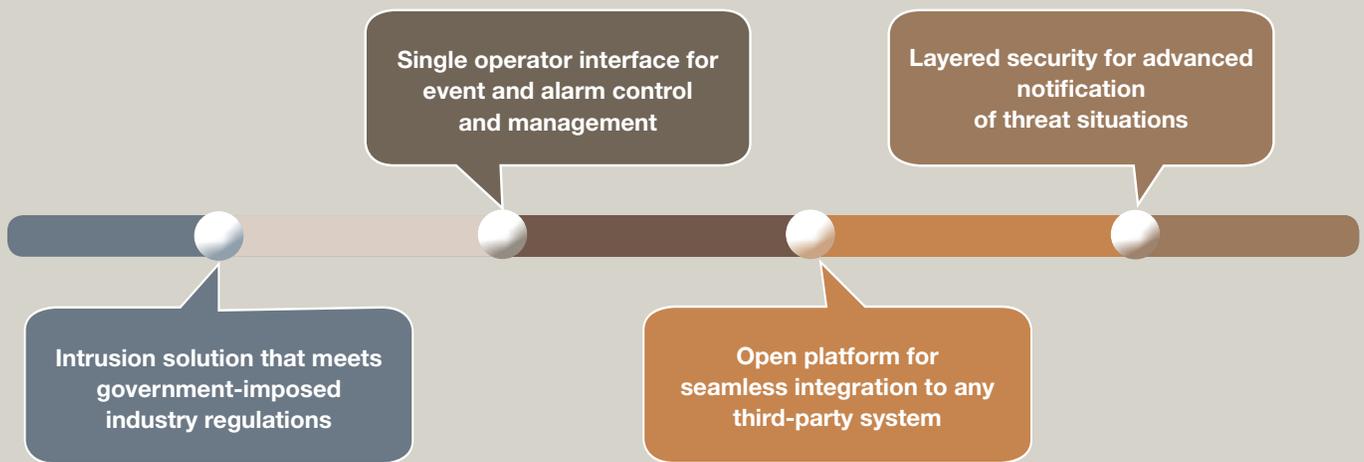

MAXPRO® VMS
Multi-system view and control with powerful customization

True video management system

Pro-Watch®
ACCESS MANAGEMENT
Access control, gates, turnstiles

COMMUNICATIONS MANAGEMENT

Integrates seamlessly to visitor management, mass notification and other systems for tighter security

COMPLIANCE REPORT MANAGEMENT

VISITOR MANAGEMENT

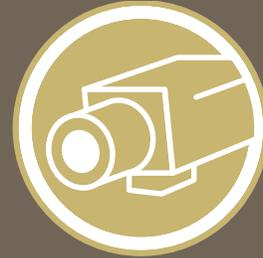

We support open standards and architecture through our Honeywell Open Technology Alliance (HOTA). HOTA enables open exchange of technology between security and IT manufacturers—maximizing an end-user's investment in existing security technology. Honeywell is also a contributing member of ONVIF and PSIA.

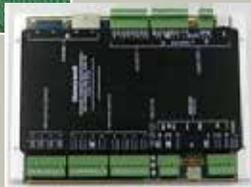

MAXPRO® VMS
VIDEO MANAGEMENT SYSTEM

Analytics for perimeter using existing cameras

Vindicator®
INTRUSION MANAGEMENT

Panels

Perimeter Protection

Integration Technology of High Security

Pro-Watch®

True Open Platform

Effortless integration with disparate and third-party systems—resulting in cost savings and increased operational efficiencies.

Designed with an open platform that offers integration, scale and flexibility, Pro-Watch 4.1 delivers access control with the ideal blend

of versatility and cost-effective performance. From seamless integration with Vindicator's high security intrusion detection to support for disconnected readers that provide more flexibility, Pro-Watch 4.1 packages all the functions you need into one powerful system.

- Drives energy savings through a more efficient use of HVAC and building management systems, enabling a real return on investment
- Integrates seamlessly to visitor management, mass notification and other systems for tighter security

Vindicator®

Intrusion Interface

Built on the military-grade Vindicator security products, our flexible, scalable solutions can be quickly and easily customized to exacting specifications—at a single site or across an enterprise. The open network architecture assures connectivity across a wide variety of communication and solution needs.

Vindicator is designed to meet the most demanding requirements of some of the world's most challenging security applications. It integrates seamlessly with Pro-Watch to provide a single interface for access control, video surveillance and perimeter protection.

- Offers layered security for advanced notification of threat situations
- Drives seamless integration to any third-party system
- Uses embedded software to guarantee maximum system uptime and instant notification of intrusion alarms
- Scalable to meet any application

MAXPRO VMS®

Video Management

MAXPRO VMS is a best-in-class video management software system that seamlessly manages video across multiple platforms. It is the integration gateway to video, access control and third-party systems.

Depending on your requirements, there are three options which range in functionality—from a free solution that allows you to view Honeywell recorders, to our high-end, full-featured video management system that enables seamless integration with third-party

systems. MAXPRO VMS brings analog video, network video, access control and third-party systems together into one command and control interface for maximum flexibility, customization and integration.

*Truly robust layers of security, seamlessly integrated—
all from one manufacturer.*

Support and Services

Behind You All the Way

Vindicator has more than 40 years of experience in estimating and design, advanced security technology and navigating complex regulatory environments. The Honeywell team can help you specify, design and implement the solution that best meets your security needs. We have extensive experience with military bases, industrial and commercial sites in the U.S. and many foreign countries. We are committed to working with our customers to develop the support and maintenance solution that best meets their individual needs. Our professional program managers can oversee every element of the solution for your facility including selection and supervision of sub-contractors, logistics planning, construction management, implementation and lifecycle planning.

Security Assessment

We can help you understand your vulnerabilities and then work with you to develop a plan for mitigating risks and securing your site within your budget.

Design and Engineering

Our experts can provide diagrams and drawings as your solution progresses from idea to reality. Not only can we help you in the estimating and design phases, but we can also assist you in navigating complex regulatory requirements.

Training and Education

We offer standard classes throughout the year at our state-of-the-art training facility in Austin, Texas. We also provide customizable training catered to your specific site, application and system. Many operators, installers and integrators have been trained and certified on Vindicator solutions.

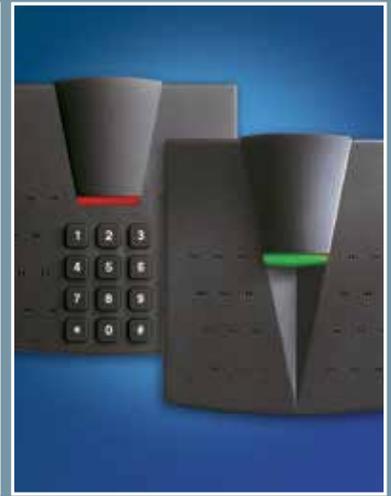

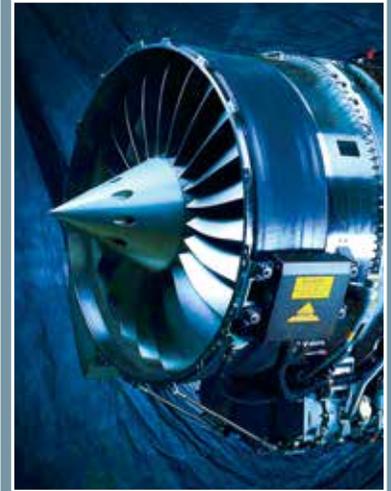

Ongoing Support and Maintenance

We offer professional phone support, in addition to optional 24/7 access to our certified technicians, and we work closely with our customers to provide the support and maintenance solutions to best meet their individual needs.

Honeywell can provide complete end-to-end security solutions that range from system specification and design, through installation and commissioning and support.

Our Brand Stands for Quality

Honeywell is a Fortune 100 company that invents and manufactures technologies to address some of the world's toughest challenges in energy efficiency, clean energy generation, safety and security, globalization and customer productivity.

From our Aerospace division to Automation and Control Solutions, from Performance Materials and Technologies to Transportation Systems, we have an unrelenting focus on performance, quality, delivery, value and technology in everything we do.
